Lighting

- Adjusts the overall contrast of an image, and sometimes affects its color

Quick Fix preview

● Adjusts the overall contrast of an image, and sometimes affects its color; if your image needs more contrast and it has a color cast, you can use the following options:

- Levels
- Contrast

Quick Fix preview

Original

Levels (Auto)

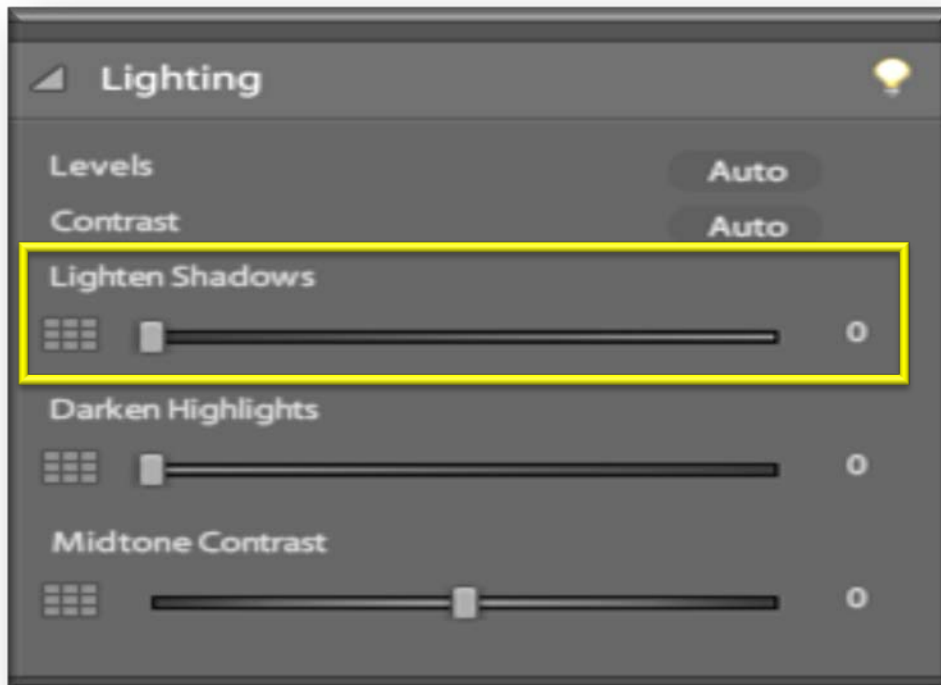

Contrast (Auto)

- These options work by individually mapping the lightest and darkest pixels in each color channel to monochrome

- To apply the settings, click the Auto button beside any of these options

Lighting > Midtone Contrast

- Adjusts the contrast within the middle tonal values (values that are about half way between pure white and pure black)
- It does not affect the extreme highlights and shadows
